

# Office

## New Office duty screen

In this section you can add an **Office** duty.

The process is very similar to adding a flight and it simply requires filling in fields. The whole process as well as all the messages and warnings are explained [here](#).

As it is shown in the screenshot, only the crew with ratings **PSN** can be added to Office duty. Unlike in Positioning duty as well as Flight duty, Office duty has only one space for Airport code.

**FTL calculations depend on individual Operator OM-7 regulations.**
