Block Time by Function

Report 'Block Time by Function' - total block time done by crew, sorted by aircraft function

In this report you can view crew block time in a selected in the filter period of time. The screen is split by functions. Right below of each column you can see **Total** block time for the particular function.

In order for Leon to calculate Crew Wages you have to do 2 things:

1. Go to Settings > Aircraft Crew Positions section and in the "Wage" column input the amount you would like to pay to your crew. You can choose the currency above the table.
2. In a JL input CMT (Commercial Time) amount.

In the filter you can sort data by either **Surname** (alphabetically) or **Flight time** (from the highest amount of block time to the lowest). It is possible to export data to PDF file.
