Empty Legs

Report 'Empty Legs' - flights without passengers, marked in Edit Flight page as E.L.

When you add a new flight to Leon and it is an empty leg, you can mark a checkbox **E.L.** in Edit Flight screen.

In the Flights List all such flights, in the column PAX, have an indication **empty** displayed.

All flights marked as 'Empty Legs' can be generated as a report, where, apart from schedule & route, also aircraft capacity and block time is displayed.
