2021/05/16 17:53 1/1 Flight Watch Summary

Flight Watch Summary

Report 'Flight Watch Summary' - aircraft flight times

If you enter **Flight Watch** details to Leon you can generate a report where you can find all FW data in a selected period of time.

Apart from Flight Watch details, the report itself also shows date of each flight, trip number, the schedule and block time as well as pax and cargo details.

In a filter you can select aircraft type or registration. It is possible to export the report to **Excel** file.
