FTL Violations

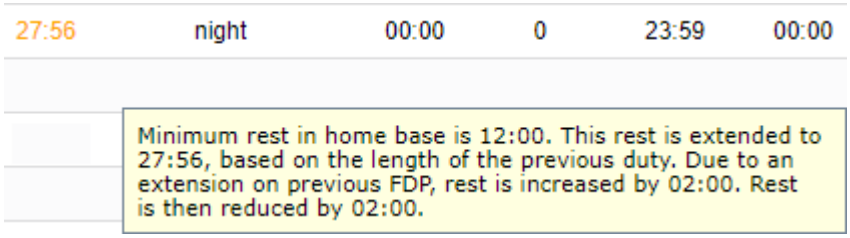

Report 'FTL Violations' - all FTL exceedances are indicated in red

This report shows all FDP, Duty, Rest **violations** along with Cumulative duty or Block time violations in a selected period of time in the filter.

In the filter you can select available options:

- **Position type** - select between cockpit & cabin.
- **AOC** - can be used by the operators with more than 1 AOC rule applied in the FTL Settings. Allows filtering the report by specific AOC
- **Show block times** - a new column will show crew block times in FROM-TO format (i.e. 12:00 - 15:40).
- **Deleted trips** - displaying deleted trips in the report.
- **Report status** - Leon will show a checkbox 'Report received' to be marked (click 'Submit' once it's marked).
- **Include CD** - Leon will show 'Commander's Discretion' column with the max FDP extension due to CD marked in the Journey Log.
- **Show violations on empty days** - showing Days off violations on days without duties.
- **Show airport codes** - selection between ICAO & IATA codes.
- **Rest column** - Leon can show either 'Rest before duty' or 'Rest after duty'.
- **Highlight reduced rest** - rest reduction cases will be highlighted in yellow (see screenshot below). If the checkbox is unticked, reduced rest records will not show in the report

- **Highlight FDP extension** - FDP+ cases will be highlighted in yellow. If the checkbox is unticked, FDP+ records will not show in the report
- **Registration** - filtering by the aircraft registration assigned to the FDP

Example of approved FTL violation

- **Approved** - checkbox that allows indicating if the violation was approved (as a Commander's Discretion)
- **Violation note** - field to insert the reason for violation or information about the approval of Commander's Discretion. Once inserted, it appears in the OPS section in the CREW tab > FTL Calculations subsection. Example in the screenshot on the right

You can export this report data to **PDF** or **Excel** format.
