

Pax Work

The screenshot displays the 'Pax Work' report interface. It features two data tables side-by-side and a filter panel on the right. The left table, titled 'Report to Excel', shows flight details with columns: Date, Flight No., Stop, Distance (km), Pax, Pax capacity, and Pax work. The right table, titled 'Filter', shows aircraft details with columns: Aircraft, Pax, Pax capacity, and Pax work. The filter panel includes dropdown menus for 'From' and 'To' dates, a 'Filter' button, and a 'Reset' button.

Report 'Pax Work' - passengers data on flights: total number, capacity, pax per kilometer

This report is split into **2** parts:

1. **Pax work per a flight** - it shows each flight with details such as: date, flight number, distance, pax on flight, pax capacity, pax work.
2. **Pax work per an aircraft** - displays data per aircraft: distance, pax on flight, pax capacity, pax work.

Pax work: done - distance in kilometers multiplied by the number of pax inserted to Journey Log.

Pax work: offered - distance in kilometers multiplied by the number of max pax capacity on a particular aircraft.

In the filter you can view data by a flight number, aircraft registration or type, data source, traffic (domestic or international) or country.
