Scheduled Maintenance

Report 'Scheduled Maintenance' - the list of planned aircraft maintenance

All scheduled maintenance added to Leon in section MX > Scheduled Maintenance can be displayed as a report and exported to Excel.

The report itself shows information such as:

- **Aircraft registration number**
- **Location** (where maintenance will take place)
- **Schedule** (date & time)
- **Type of event** (whether maintenance is scheduled or not)
- **Work order number**
- **Supplier name**
- **Comments / Observation**

In the filter you can select aircraft registration and include maintenance options.
