Top 100 Routes

Report 'Top 100 Routes' - the most popular routes per number of flights or number of passengers

This report can be useful for SALES department to check what are the **most popular routes** in previous 6 or 12 months.

The report itself shows mostly flown routes and the number of flightsalong with the number of passengers. In brackets Leon shows percentage.

In the filter you can sort data by either Journey Logs inputs, scheduled times or available (scheduled, if no Journey Log inserted). You can also display data based on either number of flights or the number of passengers.

It is possible to exclude **London City** airports as well as technical & training flights.
