

# REPORT WIZARD

Report Wizard main page

**Report Wizard** has been created to replace in the future **Custom Flights List** report. The main aim was to allow quick & easy creating & storing various type of reports in one page (crew flight times, aircraft block hours, fuel usage, PAX data, etc....).

Each created and saved report can be **edited** and **re-arranged** in many ways. Leon users can decide what columns should get displayed in the report and in what order, they can choose period of time for each report and name each report the way they want.

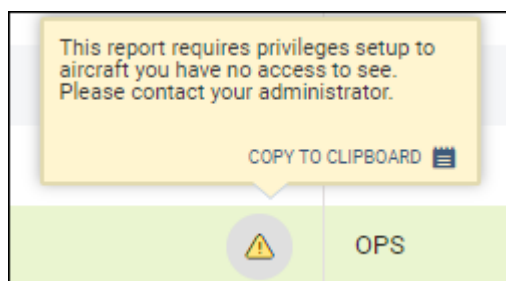

Report Wizard is available in a section **Reports**, at the top of the drop-down list. All saved reports can be found in general Report Wizard page.

The main page is divided into **3** sections:

1. Upper part of the Wizard page shows all created & saved reports by an operator. They can be edited & amended.
2. Lower part of the page shows reports made available by Leon - they can not be deleted by an operator.
3. Right part of the Wizard shows long-term reports (for time-range longer than 92 days), which can be downloaded to Excel or PDF file (and then eventually deleted).

You can type a report's name into a 'My reports' field to search for a particular report, or use 'Category' drop-down box.

If Leon user tries to view a report for an aircraft, which he/she has **no access** to (defined in Privileges panel), Leon will show a warning as on below screenshot:

---

## Creating & editing reports

Creating a report in a Report Wizard panel in Leon

To create a new report click **ADD REPORT** icon at the bottom and you will see the pop-up window where you can choose a **scope** according to which the report should be created, as well as select one of a report's **category**: OPS, Crew, Flight Statistics, MX, Reports for Authorities, Sales & Custom.

Each scope contains a different set of columns which is generated from different parts of Leon. **More information about each scope is available further on this page.**

After choosing the scope, the report page will open. On the left-hand side, you can find a filter with available data items, which - when marked - create **columns** in the report. Used items turn from

You can use a field 'Search' to quickly find the desired item. You can also add items by dragging & dropping the item from the filter straight into the 'Columns' bar.

When creating a new report Leon applies set of default columns. Taking scope 'Flights' as an example, there are 7 default columns available:

- **DATE ADEP Plan UTC**
- **Flight number**
- **Registration**
- **STD UTC**
- **ADEP ICAO Plan**
- **STA UTC**
- **ADES ICAO Plan**

Displayed columns can be manually changed by clicking  icon. When columns-names show, simply click & place a particular column to where you wish it to be.

Once the report is done you can save it giving it a name (use 'Save as' button) and it will be available in the main Report Wizard page. Saved report name can always be changed in the top part of the creating when you click pen-icon in the **Crew flight & block times**  link.

Viewing and editing a report

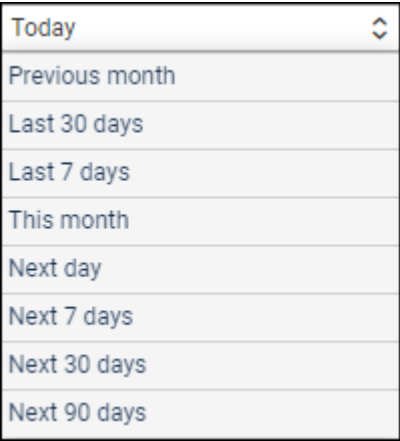

When viewing already saved report Leon shows it with all initially selected columns and period of time. Click an icon  **EDIT** to **edit** it, in case you want to make changes (select different columns or use filter).

CALENDAR

In the calendar section of the Wizard you can either select a period of time:

Or use one of the options in the drop-down list:

It is possible to **export** a created report to PDF

by clicking  to Excel  icon, or to CSV

 - in top-right corner of the page.

'Edit Template' function

Edited version of the report

'Edit template' function allows editing the report in HTML and creating an alternative and more complex version of the same report including options such as:

- changing the headers in the report
- highlighting data
- sorting the report according to aircraft flights
- implementing charts
- and many more

In order to access the HTML version of the report you need to:

1. Edit an existing report or create a new one
2. Click on  icon located in the top-left corner of the report

The edited view is divided into 3 sections:

1. **Editing** - left-hand side section where you can amend the report using HTML (in tabs HEADER, BODY and FOOTER) and CSS (in tab CSS)
2. **Preview** - the middle part where you can preview the amended report in either HTML or PDF version
3. **Data and Settings** - right-hand panel. In the 'DATA' tab you can select the data range in the report as well as access the 'Available data' source to use in the editing section. In 'SETTINGS' you can amend the design options including margins and page orientation

## Adding custom fields to available data

Option to add custom fields

It is also possible to **add** custom fields in the Report Wizard edit template.

This functionality is useful when there are additional fields needed in the **available data** or if existing fields are to be assigned a different name.

In order to **create a custom field** you need to perform the following steps:

1. Click on  which will appear if you hover the mouse over the report name. You can also click on the report from the list and select  option

2. In the pop-up window (presented on the right) you can insert the **Field name** (element on the right in the Available data column, used in HTML in 'Edit template') and **Field value** (element on the left in the Available data column, pulling the data out from indicated column in the report). It is possible to add a number of custom fields at once by clicking on '**+ ADD MORE**' button
3. Added custom fields will be available in the 'EDIT TEMPLATE' > 'AVAILABLE DATA' column > 'custom fields' section and can be used in HTML

Visibility of the saved reports in Wizard

Each Leon user who has the access to the Wizard Report is now able to create and save a report to which no other user will have access.

After creating the report, right next to the field where the report can be named/renamed there is a checkbox **Visible only to me** ☒ - if it's marked, that report will be visible **ONLY** to the user who has created it - no other user will see it, unless the checkbox is unmarked.

If the checkbox is unmarked all users will see the report and will be able to view it **BUT** will not be able to make changes to it (SAVE button will be inactive).

On the main Wizard Report page, in a column **Visibility** each user can check which reports have been enabled to all users (indication 'Company') and which ones are blocked (indication 'Only me').

CO2 emission (BF FR) [JL][t] ×	Difference between Block fuel & Fuel remaining value from JL (in tons), multiplied by a constant factor: 3.16 for Jet-A and 3.10 for AVGAS
CO2 emission (block time) [JL][t] ×	Used fuel calculated based on an aircraft performance (in tons) and Block time from JL, multiplied by a constant factor: 3.16 for Jet-A and 3.10 for AVGAS
CO2 emission (FBU FR U) [JL][t] ×	Difference between Fuel before uplift and Fuel remaining, increased by Uplift value from JL (in tons), multiplied by a constant factor: 3.16 for Jet-A and 3.10 for AVGAS
CO2 emission (U) [JL][t] ×	Uplift fuel value from JL (in tons), multiplied by a constant factor: 3.16 for Jet-A and 3.10 for AVGAS

Create report

Scope

Flights Aggregated Statistics

Description

Contains data related to flights, aggregated by specific factor.

CANCEL

CREATE

Once you open the report, there are different available data comparing to 'Flight' or 'Positioning' type of report.

Looking at the '**Available Fields**' section on the left-hand side, there are 5 measurements available:

- **Flights count**
- **Block time [JL] [AVG]**
- **Block time [JL] [SUM]**
- **Block time [Plan] [AVG]**
- **Block time [Plan] [SUM]**

Bar chart view

Once you chose the 'Available Fields', the data in the report can be presented in 2 different views:

- **Table view** - standard table view upon clicking on  icon.
- **Bar chart view** - view represented in the screenshot on the right-hand side, available upon clicking on the  icon. the data shows in a tooltip upon hovering the mouse over the specific bar.

The data displayed can be **grouped by**:

- **PAX age** - calculating data for PAX.
- **Aircraft type** - calculating data for a specific type of the aircraft.
- **Aircraft** - calculating data for a specific aircraft registration.
- **Route** - showing data per route flown.
- **Client** - showing data per a clients selected in quotes.

The  options available are:

- **Aircraft** - fleet tails.
- **Aircraft type** - fleet types.
- **Clients** - type client's name/surname to narrow down displayed data (you can select more than one client).

- **Excluded clients** - select client/clients which should not appear in the report.
- **Journey Log** - viewing flights with added Journey Log only.

## HIL scope

HIL Item no.	MEL Item no.	Registration	Date	Limit	Extension Due Date	Date C/W	Discrepancy Description	Flight Limitations	Status
723	12312	H-BCTB	26/04/2023	24/04/2023	26/04/2023		none	Yes	Open
84231	84231	H-BCTB	27/05/2023	25/05/2023			average	Yes	Open
352436354	352436354	B-AUT1	25/05/2023	24/05/2023			excluded client's aircraft	Yes	Open

Example of HIL report

HIL reports show the data related to HIL items. Columns available are:

- HIL item no.
- MEL item no.
- Registration
- Date
- Limit
- Extension Due Date
- Date C/W
- Discrepancy Description
- Flight limitations
- Status

## Trips scope

HIL Item no.	MEL Item no.	Registration	Date	Limit	Extension Due Date	Date C/W	Discrepancy Description	Flight Limitations	Status
723	12312	H-BCTB	26/04/2023	24/04/2023	26/04/2023		none	Yes	Open
84231	84231	H-BCTB	27/05/2023	25/05/2023			average	Yes	Open
352436354	352436354	B-AUT1	25/05/2023	24/05/2023			excluded client's aircraft	Yes	Open

Example of Trips report

**Trips report** allows creating the reports for the whole trips, rather than single flights.

To create this report you need to select option 'Trip' in a 'Scope' dropdown list:

Create report

Scope

Trips

Description

Contains data related to trips.

CANCEL

CREATE

The columns in this report contain basic trip details as well as elements of the quotation including Taxes.

This report is suitable for the Sales teams who would like to see the details of the trips performed by the operator.

### Simulator

Simulator	Category	Sub-category	Value	Unit	Value	Unit	Value	Unit	Value	Unit
Simulator 1	Crew	Flight	1000000	USD	1000000	USD	1000000	USD	1000000	USD
Simulator 2	Crew	Flight	1000000	USD	1000000	USD	1000000	USD	1000000	USD
Simulator 3	Crew	Flight	1000000	USD	1000000	USD	1000000	USD	1000000	USD

'Simulator' scope based report

**Simulator** scope allows creating the reports based on the Simulators added in Leon.

To create this report you need to select option 'Trip' in a 'Scope' dropdown list:

Create report

Scope

Simulator

Category

Crew

CANCEL

CREATE

The columns in this scope contain the information inserted when planning and completing the Simulator in Leon.

The report is suitable for the teams responsible for crew training, flight-based endorsements, and currencies.

## Subcharter flights scope

Ssubcharter flights report contains details of every single leg of each booked subcharter quote. The columns available describe flight details like:

- Aircraft
- Schedule
- Flight/block times
- Contract details
- Crew members
- Client

## FTL Duty scope

To make it easier to generate a **FTL** report, we have added a separate **FTL duty scope** showing strictly FTL data.

In the main Wizard report page click **ADD REPORT** and select 'FTL duty'.

Filtering by Crew member status

Filtering by Crew member status

We have added an option to filter by '**Crew member status**' in the 'FTL Duty' scope.

There are **3 options** available to filter Crew members:

- **Active**
- **Inactive** - applies to Crew with 'Can log into Leon' checkbox unticked in the User profile
- **Deleted** - applies to Crew with 'Active' checkbox unticked in the User profile

All the elements of the filter work on 'either/or' basis. If you filter by Crew members with statuses 'Active' and 'Deleted' the report will display data for Crew who are active or deleted.

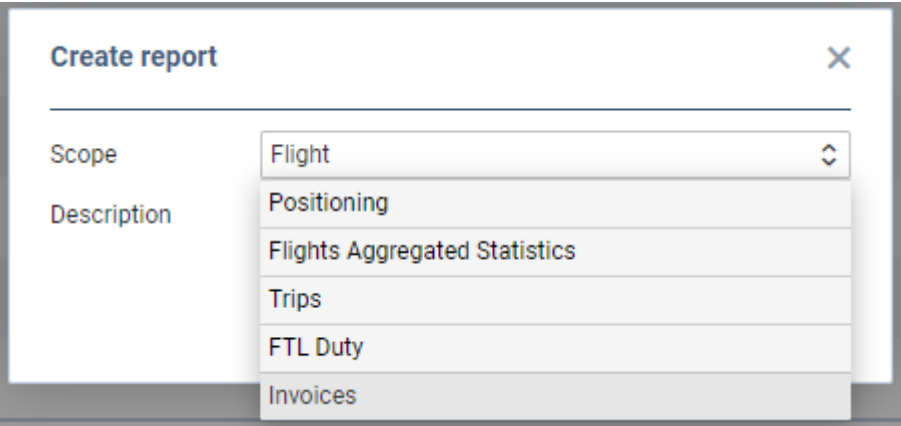

Invoices scope

Invoices report generated from Wizard

**Invoices** are important part of each Sales department of any company. We have added an additional 'Invoices' scope to the WIZARD REPORT page, so that Sales can generate, name and save a report containing only Invoices details (taken from **Requests/Quotes** panel).

In the main **WIZARD REPORT** page click **ADD REPORT** and select the scope 'Invoices' to generate a report to which you can assign such columns as: Invoice No., Requested by, Sell date, Billing date, Total Gross or Total Net. These and other details of the invoice can be selected in the columns panel on the left.

Use the icon  for further filtering options: click **Quote request status** and mark available checkboxes (statuses of the quote) from the list: New request, Quoted, Rejected, Option, Contract sent, Booked, Invoice sent, Brief sent and Done.

Use the icon  in case you need to remove columns or change their order (drag & drop columns).

Currency Converter Filter

**Once the Invoice document is sent** to a Client, the 'Invoice.pdf' document is available in the **Report Wizard** scope 'Invoices'. There we added a column called '**Invoice PDF**' which contains a link to the particular invoice on the server.

Invoice No.	Quote Request ID	Sell Date	Billing Date	Total Gross	Invoice PDF
INV28EKNU	L-28EKNU	22/05/2020	22/05/2020	61508.68	<a href="https://lsotest2.s3.amazona...">https://lsotest2.s3.amazona...</a>

**The file is available on the server for a limited time only due to AWS restrictions.**

Currency Converter filter in scope INVOICES

We have added the 'Currency converter' filter in the scope INVOICES.

This filter allows converting the amount displayed in the 'Total Gross' column from the currency selected in 'General Settings' > 'Default currency (Price List)' to any other selected currency.

The conversion rate is the rate of the National Bank of Poland on the date of invoice

'Date range type' filtering

It is possible to set the date range invoice filtering to the 3 following options:

- **Sell date** - selected date range applies to the date when the **trip was sold**. This is also a

default setting

- **Issue date** - selected date range applies to the date when the **invoice was issued**
- **Earliest departure date [UTC]** - selected date range applies to the date of the flight within the trip **departing earliest**

Example

Examples of 'Date range type' filtering

As you can see in the screenshot on the right, the date range is selected from the 2nd of November to the 1st of December.

Based on the different 'Date range type' filtering options the report displays the following:

- **Sell date** - all invoices issued within a given period are displayed
- **Issue date** - Invoice no 123456 isn't included, since the issue date is outside the date range selected (02/12/2021)
- **Earliest departure date [UTC]** - Invoice no 1001 isn't included since the flight departing the earliest is scheduled outside the date range selected (04/12/2021)

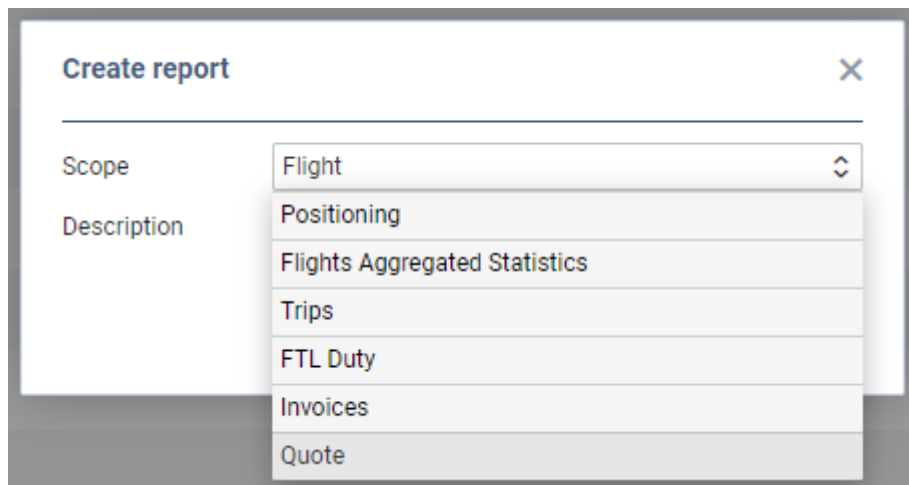

Quote scope

Scope 'Quote' in Wizard Report

The new scope **Quote** has been added to make easier generating a report with all relevant details of quotes.

In the main **WIZARD REPORT** page click [ADD REPORT](#) and select scope 'Quote'.

On the left you can find available items, which you can add to the report, such as: Aircraft, Assignee, Price, Quote route, Sum block time, Sum PAX number and more.

Use the icon  for available filtering options: Aircraft (registration), Aircraft type, RFQ status (new request, quoted, rejected, booked, done, etc...), Subcharter (yes or no) or Trip status (confirmed, option or opportunity).

Use the icon  in case you need to remove columns or change their order (drag & drop columns).

In the top-right corner you can select period of time and export the report to Excel or CSV. Once the report is saved, you can edit it and also export it to pdf.

The following columns work only in the 'Price' quoting mode:

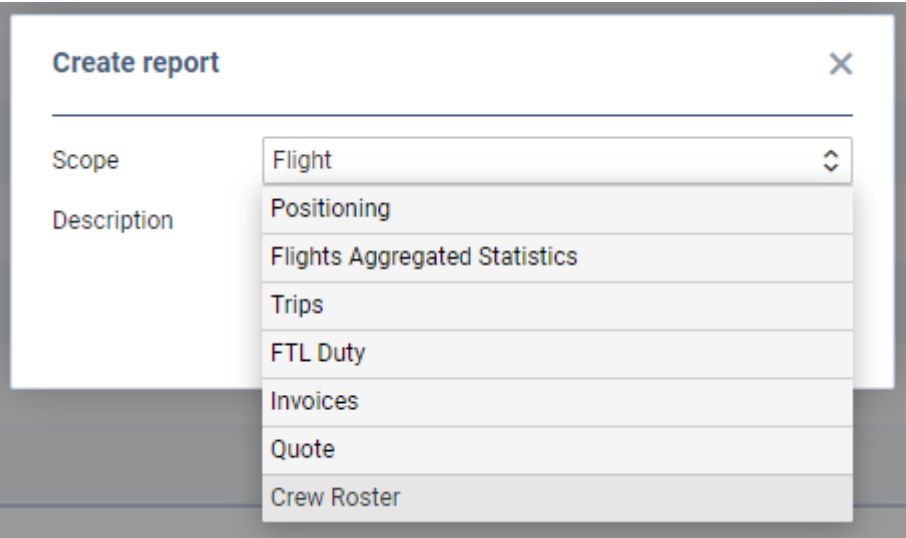

- **PAX Flight Fee**
- **Ferry Flight Fee**
- **PAX Flight Fee Discount**
- **Ferry Flight Fee Discount**

---

## Crew Roster scope

This new scope allows generating reports strictly based on **duties added in the roster** (in both: Crew Duties and Crew Panel sections).

To add it, go to main Wizard page, click  and select 'Crew Roster'.

Scope 'Crew Roster' in Wizard report

Once it's selected, Leon will show a few default columns - use left-hand filter to either add more columns, or to remove not needed ones.

Columns

This new scope's columns filter contains of most important details, such as: crew member, aircraft, duty start & end, duty type & name, duty duration and more. See the screenshot on the right to see all available columns.

CANCEL

CREATE

Leon will show a few **default columns**: MX name, status, aircraft reg number, airport where MX will take place, MX start & end date and time.

You can add more columns to the mentioned ones by using the left filter. All available columns displayed on the screenshot on the right-hand side.

It is possible to filter the report by: Aircraft reg number, Airport, AOG (yes/no) and Status of Maintenance (open/completed) - click the icon

and select one of the available filter options.

## Vaccinations scope

The scope allows to generate a report which contains the vaccination data of your crew members. It collects data from the users' profiles. The data set contains the following columns:

- Name
- Surname
- Disease name
- Disease note
- Date of 1st dose
- Date of 2nd dose
- Date of 3rd dose

## Aircraft Reservations scope

Report	Scope	Report	Report	Report	Report	Report	Report	Report	Report
Aircraft Reservations	Aircraft Reservations	Aircraft Reservations	Aircraft Reservations	Aircraft Reservations	Aircraft Reservations	Aircraft Reservations	Aircraft Reservations	Aircraft Reservations	Aircraft Reservations
Aircraft Reservations	Aircraft Reservations	Aircraft Reservations	Aircraft Reservations	Aircraft Reservations	Aircraft Reservations	Aircraft Reservations	Aircraft Reservations	Aircraft Reservations	Aircraft Reservations

'Aircraft Reservation' scope

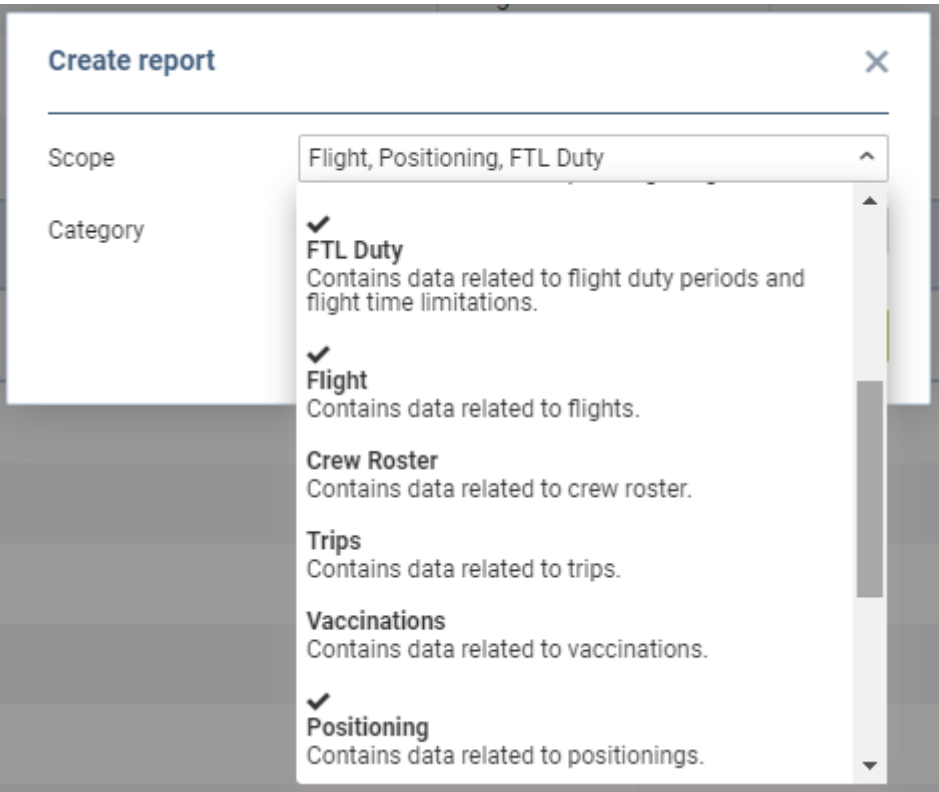

**Aircraft Reservations** scope contains the data related to aircraft reservations.

The report contains all the required information including reservation name, status, airports, timeframes as well as notes and the confirmation of uploaded files.

It is also possible to filter by the abovementioned characteristics. 'Name (wildcard)' filtering option allows filtering by the custom name rather than the name from the dropdown.

## Multi-scope reports

When creating a new report, it is now possible to select more than 1 scope by clicking them in the drop-down list.

MULTI SCOPE									
Scope	Scope	Scope	Scope	Scope	Scope	Scope	Scope	Scope	Scope
FTL Duty	Flight	Crew Roster	Trips	Vaccinations	Positioning	FTL Duty	Flight	Crew Roster	Trips
Contains data related to flight duty periods and flight time limitations.	Contains data related to flights.	Contains data related to crew roster.	Contains data related to trips.	Contains data related to vaccinations.	Contains data related to positionings.	Contains data related to flight duty periods and flight time limitations.	Contains data related to flights.	Contains data related to crew roster.	Contains data related to trips.

Multi-scope report in PDF format

Editing the report in HTML

On the main page Leon shows scopes on the **menu bar**, available to be selected & configured separately.

Once the report is set up & saved, when exporting it to Excel, Leon will show each scope as a **separate tab**  showing previously configured columns & data.

The **PDF** format will show scopes one after another. Each multi-scope report's template can be edited in **HTML** or **Excel** and adjusted (see screenshots on the right).

## Long-period reports

It is possible to generate a long-period reports in Wizard, for more than **90 days**.

When generating a new report or editing already saved report in Wizard for a period of more than 90 days, Leon will show **Time range too long** warning, however, you will still be able to generate the report.

Click a blue button  and after a few seconds Leon will show an information: **Report successfully ordered**. Go back to the main Wizard page and on the right-hand side of the

screen you will see the progress-icon 

Once the report publication is done Leon shows 'Download' icon allowing you to view the report in either PDF or Excel file.

You can **delete** such report by clicking on the  icon.

## Sending schedule functionality

Sending Schedule main window

It is possible to **send schedules** from **REPORT WIZARD** to particular recipients in pre-defined periods. Each stored report can be sent out frequently by using this functionality. Leon will send an email with the files attached in any selected format: **Excel, CSV & PDF**.

Setting up

Before sending any schedule, some setting up is required.

First step is defining **email templates** for this panel, in a section Settings > Email Templates. Here you need to click **ADD TEMPLATE** select **Report Wizard Schedule**, insert template's name and save.

Add template

Report Wizard - the main view on saved reports

In the main Report Wizard page, edit a report that should be sent frequently and click a button **SENDING SCHEDULE** in the top-right corner, then a new pop-up window will show up (as on the screenshot on the right side).

In this pop-up window you can select the timeframe of the report - **Report Dates**. The best solution is to select the pre-defined dates sych as '-14,now,+14'.

Manually type recipient's email address (or addresses, as it's possible to add multiple emails - after inserting an email address press **'Enter'** and add another one).

Email(s)

Type email and press enter...

sales@manaviation.aero

ceo@manaviation.aero

accounts@manaviation.aero

It is possible to choose between **3 types of frequency**:

- **Daily** - reports sent on a daily basis. Option to select the hour(s) at which the report should be sent
- **Weekly** - reports sent on a weekly basis. Option to select days of the week and the hour(s) at which the report should be sent
- **Monthly** - reports sent on a daily basis. Option to select days of the month and the hour(s) at which the report should be sent
- **Selected Dates** - reports sent on a yearly basis, on selected dates (dates are specified without a year - days and months only)

All times in **Hours** dropdown are in **UTC**.

## Filters

### Calendar

In the top-right corner you can find date-selector where you can use either a button  and navigate with arrows, or click  to open a calendar where you can mark period of time. You can also use one of the available, pre-defined options on top of the calendar: **Today**, **Last 7 days**, **Previous month** or **This month**.

### Data filter

By clicking the  icon Report Wizard allows to narrow down the displayed data by various details, such as: aircraft type & registration, ADEP & ADES, Flight number, Trip type, Cancelled legs or legs with Journey Log added.

Click **Add** and Leon will show a pop-up window (as on the screenshot on the right) where you can choose available data: click a particular one and either mark appropriate details, as per example below, where only 3 tails are selected:

### Data filter in Report Wizard
