

Airport Directory panel has been modified and moved from the section OPS - now it appears on the **menu-belt** as a separate feature.

Click to get an access to airports information

Click on the **Airport Directory** icon to get a pop-up window where you can search for a particular airport or airports per a country.

Type airport code, name or city to get information

Click to get the list of countries or type country in the field

ICAO	IATA	CUST	City	Name	Country	Info	Required for dispatch	Category	Notes

Notes

Brief

You are able to **edit and change** details in the framed fields like i.e. 'Website', 'Tower Phone', etc...

If manually added information should remain **private**, you should click on the **paddlock-icon** that shows up between a field with the information and the name of the field.

Tower  
Phone

+44 9987 3367 ▼

If you **hover the mouse over** it you will see a message **Click to make this field private** which means that only you can see added information, nobody else. You can always undo that action by clicking again on the paddlock-icon.
