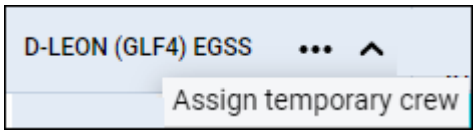
ASSIGNING CREW PROVISIONALLY

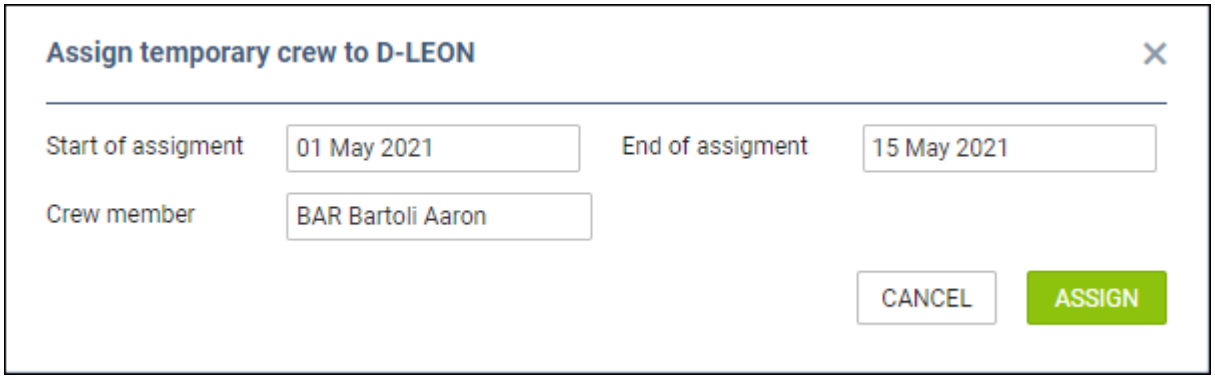
When grouping crew by the aircraft in 3-dot filter

it is possible to **assign crew provisionally**.

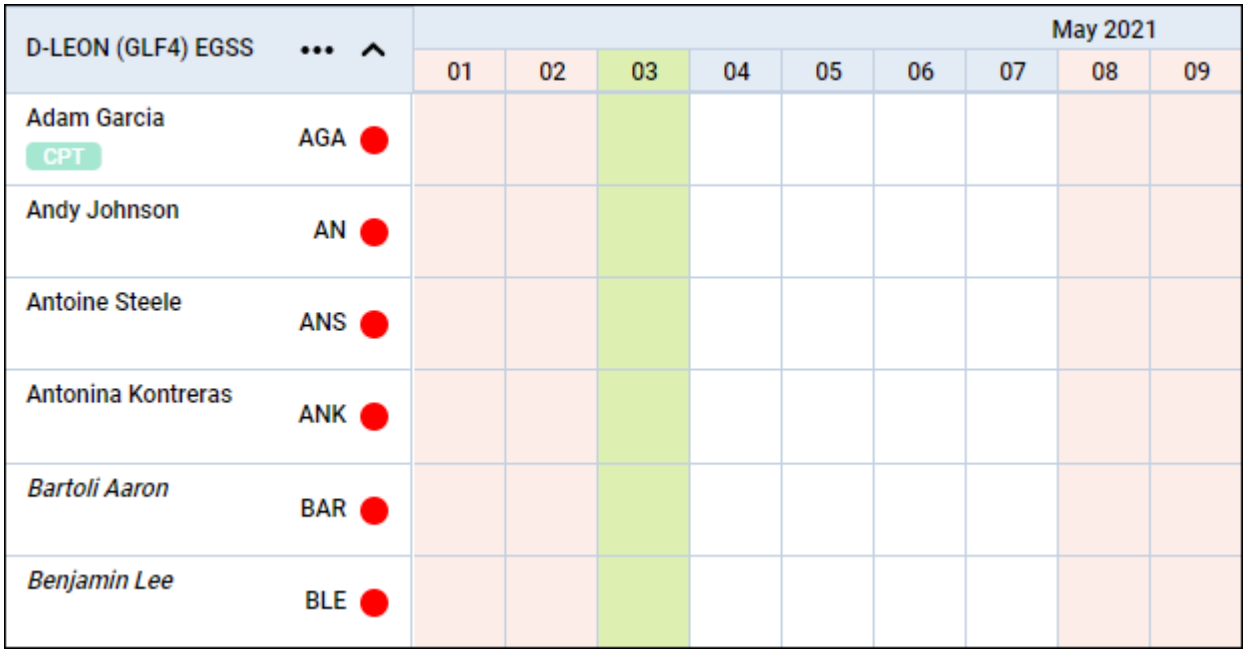
Right next to aircraft registration click 3 dots and click 'Assign temporary crew'.



In a pop-up window insert: **Start of assigment**, **End of assigment** and select **crew member/members**.



In 'Crew Calendar' page, when date range selected in calendar covers dates of assigment (either start or end date), Leon will show crew assigned provisionally in ***itallic***.



Adding duties for crew assigned provisionally works in the same way as for regular crew.
