We have implemented a few changes to the crew currency panel in Leon.

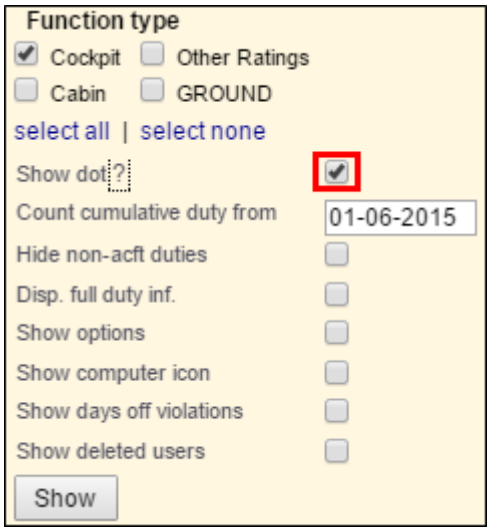

1. **Admin settings**

To turn crew currency feature on go to Admin > Operator Settings > General and in section **Crew Duties Dot Options** mark appropriate checkboxes. In a field 'In crew currency threshold' you can input a number of days after which Leon will alert if a pilot has not performed a single flight.

1. **Filter settings**

In section Crew Duties, in the filter, mark a checkbox **Show dot** - Leon will show the number of days left to expire a particular currency if you hove the mouse over the status-dot next to the crew name.
