Simulator duties

We have added an option to Crew Duties page to assign **SIM duties** which will automatically appear in a section SCHEDULE. Right below the list of your defined duties (in a section Duties Setup) you can find an option to assign **Simulator** duty to appear in a section SCHEDULE.

In the roster, SIM duty appear as a blue aircraft icon on white background 

It is possible to add **more than 1** of the bottom-list duties on the same day. If it's the same duty - click an icon  when a pop-up window shows up, after selecting duty. If it's a different duty on the same day (i.e. Office and Simulator) simply click on the same day in the roster and select another duty - Leon will show both duty icons 

Just like Positioning and Office, Simulator duty is also included in FTL calculations and appears in FTL Sheet report.
