

CREW PANEL

Below features have been added in Crew Panel:

1. **Positioning of OFF Duty crew**
2. **'Show Request' filtering option**
3. **'Clear draft changes' for multiple crew**
4. **Simulator notes in Status Bar**
5. **FDP+ checkbox in 'FTL Details'**
6. **Autocomplete in 'ADD DUTY'**

'OFF' duty Crew positioning

1. The positioning of OFF Duty crew

The crew assigned to 'OFF' Duty will now be listed as last available in the 'Assign Crew' window.

2. 'Show Request' filtering option

We added option **'Requests (shortcut key r)'** in the  filter (located in the top-right corner of the Crew Panel).

This option allows viewing/removing crew Duty Requests from the Crew Panel.

3. 'Clear draft changes' for multiple crew

It is now possible to clear draft changes for multiple crewmembers.

In order to do it you need to:

1. Click with the right-click on the crew code
2. Select an option 'CLEAR DRAFT CHANGES FOR XXX'
3. In the 'CLEAR DRAFT CHANGES' window select timeframe and crewmembers
4. Press 'CLEAR DRAFT CHANGES' button to apply

4. Simulator notes in Status Bar

If there are notes added on the 'Simulator' will now display in the bottom Status Bar.

'FTL+' option in FTL Details in Crew Panel

5. FDP+ checkbox in 'FTL Details'

We have added an option to extend max FDP in the 'FTL Details' window, as per screenshot.

The FDP+ checkbox is displayed when FDP extension rules apply. If an extension requires planning, 'FDP+' will only display when extension has been planned.

6. Autocomplete in 'ADD DUTY'

This is a very simple function which suggests the duty when you start typing the name in 'Duty' space in the 'ADD Duty' window.
