# Crew age validation

Crew age validation options

This option is available in the section **General Settings**. It might be required from the Cockpit Crew to not to fly together if they both are over certain age (60 or 65 years old).

For this, we now have introduced **3 options** for Crew age validation:

- **Disable** - no age validation
- **Enable > 60 yrs** - a warning will be issued when assigned CPT & FO both are over 60 years old.
- **Enable > 65 yrs** - a warning will be issued when assigned CPT & FO both are over 65 years old.

The warning is issued upon saving the relevant crew on the flight. The warning reads as follow:

'Assigned CPT (FO) is over 60 (65) years old'
