Crew profile re-arranged

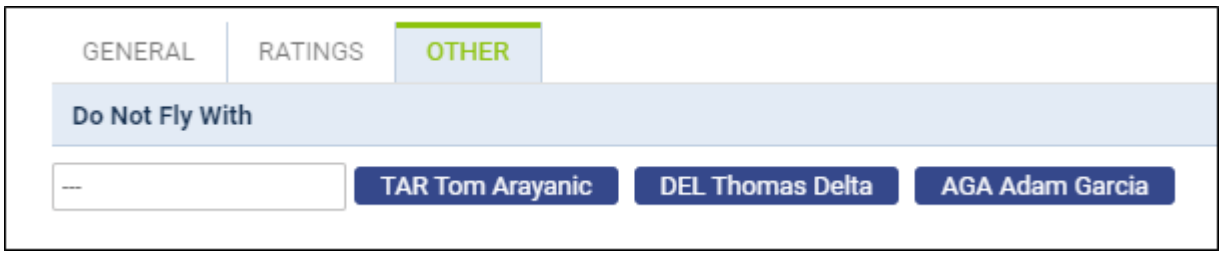

We have slightly re-arranged a crew profile window.

1 - crew ratings have been moved to a separate tab **RATINGS**.

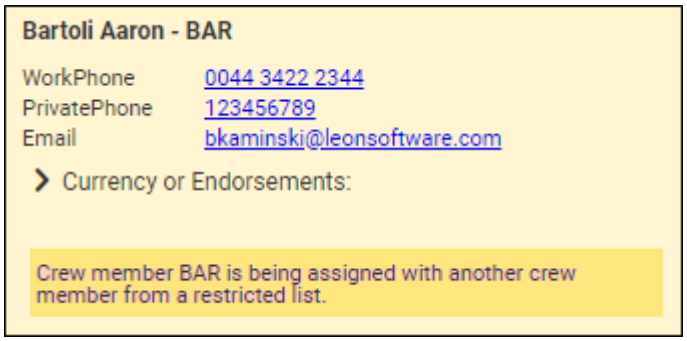

2 - we have added a new tab **Other**.

A tab **Other** allows to select crew members with whom the edited crew member **should not** fly with (for whatever reasons). Click on the field and select person/persons from the list.

Once it is saved, when a crew planner has assigned crew with someone from a **restricted list**, Leon will show a caution (crew code highlighted in yellow) - as long as in the 3-dot filter (section 'Cautions') a checkbox 'Do not fly with' is marked.
