

GAR new option

Invalid Link

GAR sending email screen

We have added two new fields to the **GAR** email edition screen: **Visit reason** and **Visit address**. Both can be filled in and will get displayed on the GAR sheet.

This option is available in both: SCHEDULE section and old version of Leon. The below description concerns SCHEDULE section.

When sending GAR emails from Leon - which can be done from the checklist - click a link **Send GAR** located right next to the GAR's status and a new pop-up window will open (see screenshot on the right). Here you can add details manually, or have them automatically displayed, if they have been previously pre-defined in a section Settings > Handling Requests ('From' and 'Cc' email addresses as well as the GAR email content).

GAR SENT (STN)	Send GAR	Requested	⌵
GAR SENT (MAN)	Send GAR	Requested	⌵

GAR items can be added to the checklist in a section Settings > Flight Editing (as default items) or by clicking **Add Item** button on top of the checklist tab.
