Change of colours

We have updated squares colours in Calendar view in Schedule section of Leon.

The most notable change is the colour of **Maintenance**:

- 

- **Maintenance**
- 

- **Maintenance option**
- 

- **AOG maintenance**

> In the future releases of Leon, striped background will be implemented to all kinds of **Options** including Flight Option, Reservation Option.

With regards to other rectangles, the colour codes are as per below:

- 

- **Flight is confirmed**
- 

- **Flight is not confirmed (option)**
- 

- **Flight is completed (Journey Log has been entered)**
- 

- **Canceled flight**
- 

- **Training flight**
- 

- **Any type of aircraft reservation**

The same philosophy applies to Planned Flights section of Leon.

Possibility to select numerous legs of the same trip

Other minor changes

- Apart from scrolling Calendar view by using the side and bottom scroll bars, now you can also **“drag & drop”** the screen.
- We have also changed the number of lines in the squares from 3 to 2.
