TBC in FLIGHT tab

'TBC' checkbox in 'FLIGHT' tab

We have added the possibility of confirming the flight times by using the **'TBC'(To Be Confirmed)** checkbox.

'TBC' checkbox can be activated in 'Settings' > 'Flight editing' by ticking the 'Show TBC (To Be Confirmed) option on the flight' option.

Once it is ticked, the 'TBC' checkbox will appear in the 'FLIGHT' tab.

Fields 'STD'/'STA' still have to be inserted before saving 'TBC' flight.

'TBC' will appear instead of 'STD'/'STA' in the CALENDAR view only.
