OPS Timeline

We have implemented a possibility to add **Day Notes** in a section OPS Timeline. It works in a similar way to the one in a section OPS Calendar.

Right-clicking on a given day in a Timeline view will generate a pop-up window where a Day Note can be selected.

Once the Day Note is added it will appear as a **yellow vertical line**. Hovering over the line will trigger a tooltip with the note text. The added Day Note will also show in OPS Calendar panel.
