

PAX national ID card

Travelling within EU does not require using a passport by EU citizens - passengers can use **national ID cards** instead.

It is now possible to add ID card's details to PAX profile and use it on the trip. Leon will show ID card's details on documents, such as: Crew Trip Sheet or PAX Trip Sheet as long as it's set up in Documents Manager panel, by using data items: 'arrivalNationalId' & 'departureNationalId'.

Adding ID card

When adding a new passenger's profile (or when editing the profile of already added passenger), click on the button **NEW NATIONAL ID** and insert ID card's details.

NATIONAL IDS		NEW NATIONAL ID	
Country*	No.*	Date of issue	Expiry date
ITA	I86962313	01 Jul 2018	22 Aug 2025

In the OPS panel (tab PAX) Leon shows expiry date of the ID card.
