

# New features in RW

We have introduced the following features in the Report Wizard:

1. **Fleet Sales Report**
2. **Additional frequency in 'Send Schedule' option**

## Fleet Sales Report

### Fleet Sales Report Overview

'**Fleet Sales Report**' is based on the scope 'Quote'.

The report provides the breakdown of each individual flight that was sold by the airline.

The report includes requests with the status 'DONE' and trip assigned to it with the status 'CONFIRMED'.

The report is divided into sections:

- **Table per each aircraft** - tables are presented per each individual aircraft and include the information such as the date, flight number, Client, offer details (including quote ID, routing and price), total hours and an hourly price and sums of price and flight time
- **Charts** - there 2 charts located below the aircraft tables: '*Summary flight time per aircraft*' and '*Summary price per aircraft*' and are the representation of percentage of flight time / price of each aircraft in the total of the fleet

## Additional frequencies in 'Send Schedule'

It is now possible to choose between **3 types of frequency**:

- **Daily** - reports sent on a daily basis. Option to select the hour(s) at which the report should be sent
- **Weekly** - new option. Reports sent on a weekly basis. Option to select days of the week and the hour(s) at which the report should be sent
- **Monthly** - new option. Reports sent on a daily basis. Option to select days of the month and the hour(s) at which the report should be sent

All times in **Hours** dropdown are in **UTC**.

Frequency	<input type="text" value="Weekly"/>	
Hour	<input type="text" value="Select hour"/>	<input type="button" value="08:00"/> <input type="button" value="15:00"/>
Weekdays	<input type="text" value="Select weekdays"/>	<input type="button" value="Monday"/> <input type="button" value="Wednesday"/>

Frequency	<input type="text" value="Monthly"/>	
Hour	<input type="text" value="Select hour"/>	<input type="button" value="08:00"/> <input type="button" value="15:00"/>
Dates	<input type="text" value="Select dates"/>	<input type="button" value="1"/> <input type="button" value="15"/> <input type="button" value="28"/>
