Feasibility check filters

Itinerary filtering options

Feasibility check 'Warnings' filter

It is now possible to select which elements should affect the feasibility check icons in the itinerary.

The feasibility check filter is located under  icon where the following options are available:

- **Warnings** - selecting the types of warnings in the feasibility check window
- **Cautions** - selecting the types of cautions in the feasibility check window
- **Notices** - selecting the types of notices in the feasibility check window

Once the new filtering options have been selected you need to **refresh** the 'Feasibility Check' column in order to apply new settings.

Only the selected options will trigger the feasibility check icon.

Items that are not selected in the filter will not appear in the feasibility check information window.

Selected elements of the feasibility check filter will be remembered per user.
