Accepting subcharters from Avinode

It is possible to accept subcharter flights requested in Avinode.

Firstly, you need to make sure that **'Add subcharter quotes automatically'** checkbox is ticked in the 'Configuration' section in 'Add-ons' > 'Avinode' integration. This will allow accepted Avinode requests to be added automatically as a subcharter quotes to matching requests in Leon.

The process is as follows:

- Client requests a trip which shows in Leon on the 'Requests/Quotes' list
- If we, as an operator, are unable to perform the request with our own fleet, we can search for subcharter in Avinode (by clicking on 'FIND SUBCHARTER/COMPARE THE PRICE' button in quote edit section)
- The request is sent 3rd party operators in Avinode
- Once the 3rd party operator confirms the request in Avinode, then this request appears in Leon as a subcharter
