New features in R/Q

2021/10/15 03:06

We have added the following new features to 'Requests/Quotes' section:

- 1. Rejecting requests from R/Q list
- 2. Empty leg requests from Avinode
- 3. Sorting options in R/Q list

Rejecting requests from the list

Option to reject a request

Rejected requests in Avinode

It is possible to reject requests directly from the list of requests.

This applies to requests received via **Avinode**, **Owner App**, as well as **inserted directly in Leon** as a New Quote.

To reject a request you need to:

0

0

- 1. Right-click with the mouse on the request you'd like to reject.
- 2. Select **REJECT REQUEST** button.
- 3. 'Reject' email window will open, where you can select either:

SKIP SENDING REJECT MESSAGE - rejects and updates the status of the request only in Leon without updating the status neither in Avinode nor in Owner App.

- rejects requests and **updates the status** to 'Rejected' in Leon and Owner App, and to 'Declined' in Avinode.

Empty leg requests from Avinode

Requested empty leg including positioning flights

Active integration with Avinode allows now downloading requests for empty legs.

Once the empty leg request is downloaded to Leon, Leon creates the full routing, including <u>positioning</u> <u>legs</u> if necessary. The aircraft selected in Leon is the same as sent in the empty leg request. If the aircraft does not exist in Leon, the request **will not be accepted by Leon**.

Leon also calculates the quotation amount based on the pricelists assigned to the aircraft in a section Settings > Fleet > tab Sales.

If the downloaded request is for numerous empty legs and for different aircraft, the routing and the quotation are created for each one of them <u>separately</u>.

Edited empty leg request contains '**Avinode empty leg**' label next to the 'VAT' box. By clicking on this label, user will get <u>redirected</u> to this request in Avinode.

Request sent from Avinode will show on the list as a new request with 'Avinode' label in 'Updated' column.

Requests/Quotes - the requests view sorted by the 'Updated' column

Currently in Requests/Quotes view there are 2 possible ways of **sorting the requests**:

•	Updated	ţF	Existing one - sorting	based on the <u>date and time of the update</u> of the
	request.			,
•	Itinerary		t≞	New one - sorting based on the <u>date and time of</u>
		the le	gs from now minus 2	This does not include the legs that already took off - 4h. It does not update the requests list and the green
