

Base Time

We have added an option to filter flights schedule not only by UTC or LT, but also by **Base Time**.

First step to use this functionality is defining **Bases** along with their **Timezones** in a section Settings > [General Settings](#). At the bottom of the page you can add bases if you have crew/staff located in a different place than the main base. You can also assign an appropriate time zone.

Bases

Name	Time zone	
Main	Warsaw (PL, UTC+02:00)	✓
BKK	Bangkok (TH, UTC+07:00)	✓ ✗

Once it's defined, when logged in, you can select a proper base in the drop-down box right next to your name.

Manual
MAN, all bases

- Main
- BKK

In the left-hand filter you can find a new option to display STD/STA times by Base Time. On screenshots below you can see that Leon changed STD/STA times from UTC to Base Time (Bangkok time zone). If it happens that the change to Base Time moves the flight for previous or day, Leon automatically shows a proper date.

Preferred time zone									
<input checked="" type="radio"/> UTC <input type="radio"/> LT <input type="radio"/> Base Time		099	Thu	07-Sep	22:00	AKL	BNE	02:00	
<input type="radio"/> UTC <input type="radio"/> LT <input checked="" type="radio"/> Base Time		099	Fri	08-Sep	05:00	AKL	BNE	09:00
