

Importing PAX list from text

Owner or Operator	Manual																							
Marks of Nationality and Registration	D-GLDN	Flight No.	324	Date	01-03-2017																			
Departure from	GND		Arrival at	GND																				
<table border="1"> <thead> <tr> <th>VEHICULAR AND DRIVER NAME</th> <th>SEX</th> <th>DATE OF BIRTH</th> <th>PASSENGER No.</th> <th>CARRIER</th> <th>NATIONALITY</th> </tr> </thead> <tbody> <tr> <td>Arjunan Senthil</td> <td>F</td> <td>10-06-2000</td> <td></td> <td></td> <td></td> </tr> <tr> <td>Arjun Senthil</td> <td>M</td> <td>06-08-1978</td> <td>000115000</td> <td>10-01-2018</td> <td>INDIA</td> </tr> </tbody> </table>							VEHICULAR AND DRIVER NAME	SEX	DATE OF BIRTH	PASSENGER No.	CARRIER	NATIONALITY	Arjunan Senthil	F	10-06-2000				Arjun Senthil	M	06-08-1978	000115000	10-01-2018	INDIA
VEHICULAR AND DRIVER NAME	SEX	DATE OF BIRTH	PASSENGER No.	CARRIER	NATIONALITY																			
Arjunan Senthil	F	10-06-2000																						
Arjun Senthil	M	06-08-1978	000115000	10-01-2018	INDIA																			

Pax Manifest document

Import from text option will allow you to add Passenger details from a file. The Passenger details will be added to the flight and Phonebook at the same time. The Passenger details have to be inserted in certain **format**. There are currently **2 formats** available, where pax details need to appear in order as below:

1. Number, Title, Surname Firstname, Date of birth, Passport number, Passport expiry date, Nationality
2. Number, Title, Surname Firstname, Date of birth (dd-mm-yyyy)

Example:

1, Mr, Smith John, 06-03-1978, ABC123456, 13-12-2020, UK

2, Ms, Smith Jessica, 03-06-2001

As you can see from the screenshot, depending on the format inserted, PAX Manifest document will be filled in fully or partially.

The **process** of importing PAX list from text is very simple:

Import pax list from text

I, Mr. Johnson Smith, 13-06-1976, ABC123456, 06-08-2020, UK

I, Mr. Smith Adams, 10-12-1968, DEF123456, 01-01-2020, UK

Parse

Import PAX list from text option

- **Choose format** - select the format you wish to use to insert your passengers from the dropdown in the 'Import pax list from text' window.
- **Insert PAX list** - in the left editable field you can either 'enter' or copy/paste PAX list in the chosen format.
- **Parse** - after inserting the list,  button will activate. This button will check whether there is any inconsistency between the format and the data inserted. If there are mistakes, Leon will display the following message: **Please check if items left in the text editor match the chosen format..** If the PAX data is inserted correctly, Leon will display: **1 pax will be added to the flight.** Clicking 'OK' button will add Passenger list to the flight.
- **SAVE** - this allows saving PAX list on the flight

It is possible to import PAX list from text when the passengers have already been added from the database. If you insert passenger that already exists in the

Phonebook, this passenger data will be duplicated. Passengers can be added to one leg at the time only.
