# PAX number changing

If you edit the flight in the lower part of **TABLE** (mark the flight on the list and click 'EDIT TRIP') and you have added PAX to the right-hand filter (from Pax Database) - you can reduce PAX number by navigating with arrows (which result PAX names disappear from the filter).

If you again increase PAX number - Leon will bring the same PAX names to the filter.

> **PAX will not be brought back to the list if you reduced the number and saved changes**
