We have removed entire section OPS from Leon. However, you will still be able to use its sub-sections. **Below sub-sections have now been moved to section `Admin`**

- **Fleet**
- **Functions**
- **Flight codes**
- **Operator colours**
- **Services**

Airport Directory has been completely removed as it is available in the menu bar (see below). You can still get a list of airports previously available in this section by viewing a report **OPS > Airport Categories**.

Sub-section **Notifications** also has been moved from section `Flights` to `Admin` and **Weight & Balance Simulation** has been moved from section OPS to section `Flights`.

> Availability of section `Admin` **does not** mean that a particular user has now access to other admin sub-sections, like: **Users**, **Privileges** or **Operator Settings**.
