

MVT Messages

This module allows to set up **Movement Emails** for each aircraft. You can define **templates** as well as add new templates. When Flight Watch data arrives to Leon a movement email will be sent out to the recipient.

For each template you can input its name, subject and template's text. **Tags** available in the **Legend** can be used so that the movement email contained all necessary information.

Templates

TEMPLATES +
Default acft ready template
Default acft ready template MVT
Default ETA change template
Default ETA change template MVT
Default landing template
Default landing template MVT
Default take off template
Default take off template MVT

Aircraft Movement Templates

There are 8 available default templates which can be modified. It is also possible to define your own templates.

A screenshot below shows an example of the **Take Off** template's text. In order to add a new template click + and add details such as:

- **Template's name** - i.e. "Aircraft owner movement email".
- **Subject** - i.e. "Takeoff movement for (Aircraft registration number)".
- **Template** - the text should contain tags available in Legend.

Dear Sirs,

We wish to inform you that the aircraft {{REG}} on flight no {{FLIGHT}} from {{ADEP_NAME}} {{ADEP_IATA}} to {{ADES_NAME}} {{ADES_IATA}} has taken off at {{TO}}. {{#ETA}} Aircraft is scheduled to arrive to {{ADES_NAME}} {{ADES_IATA}} at {{ETA}}.{{/ETA}}

{{#PAX}}Aircraft has {{PAX}} passengers on board.{{/PAX}}

Once the **Flight Watch** data is filled in an email for the above template would be as on the example below:

"Dear Sirs,

We wish to inform you that the aircraft B-ARTI on flight no BAR21 from WARSAW FREDERIC CHOPIN WAW to GENEVA INTERNATIONAL (GVA) has taken off at 07:15. Aircraft is scheduled to arrive to

GENEVA INTERNATIONAL GVA at 09:45. Aircraft has 23 passengers on board.”

Rules

Defining take off & landing rules for the aircraft

By clicking on a particular aircraft in a section **Fleet Rules** Leon opens a new screen where you can select **Scenario** (Take off, Landing, Aircraft ready, ETA update) and **Template** (select between those defined on the right-hand side).

You can also insert a recipient's email address as well as CC & BCC email addresses - this should be done for both: take off & landing MVT emails.

Each Rule has **Client** checkbox available which will allow you to include Client in relevant MVT email.

A button **ADD RULE** allows to add custom rules (i.e. a separate rule for a client).

Legend

The legend contains **Tags** and right next to them their description plus **Test Data** column showing examples (see below).

TAG	DESCRIPTION	TEST DATA
{{ADEP_ICAO}}	Airport of departure (ICAO)	EPWA

When defining templates you should use tags displayed in Legend only. In case you need an additional tag, please contact support@leonsoftware.com
