Apart from **90 days currency** of the crew that must be monitored by operators (click here for more information, section 'Cockpit crew status') some operators have to track that the **crew have flown at least once** in the last **28** (Europe) or **30** (Asia) days - that includes '**Simulator**' flights.

You can easily check if a particular crew member has flown in the required period of time by going to the section `Crew Duties` table and hover the mouse over the status-dot. Make sure that in the filter the checkbox '**28 days currency (cockpit)** is ticked (see below).
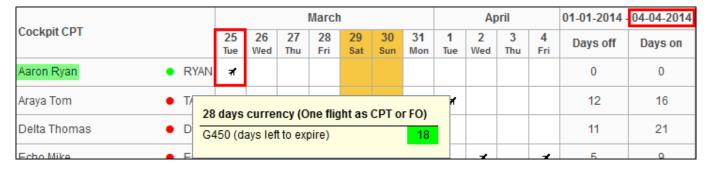

Cockpit crew status
- ☐ 90 days currency (cockpit)
- ☑ 28 days currency (cockpit)
- ☐ Endorsements required for dispatch

Leon will update 28/30 days currency if 1 of the below requirements is fulfilled:

- **1** - a crew member has been added to a flight (**New Flight** section, type 'Commercial') - 'Journey Log' required.
- **2** - a crew member has been added to a flight (**New Flight** section, type 'Simulator') - no 'Journey Log' required.
- **3** - a duty type 'training' has been assigned (**Crew Duties** section) i.e. 'Simulator' or 'Training'.

EXAMPLES

On the screenshot below crew RYAN had flown his **last flight** on 25-03-2014. The date of checking the status is 04-04-2014. When hovering the mouse over the status-dot Leon shows the information, that 18 days left to expire the **28 days currency** for the particular **type of the aircraft**.

When you add a training-type duty (defined in **Crew Duties > CDR Definition** section), i.e. SIM - Leon will also take this simulator-flight into overall **28 days currency** calculation. The example below shows that crew RYAN had done SIM flight on 31-03-2014. The date of checking the status is 04-04-2014 - Leon shows that 24 days left to expire the **28 days currency**.
