FTL Calculator

FTL Calculator

FTL Calculator is a tool that helps you planning Crew duties with accordance to Operators Flight Times and Duty Limitations.

It is located in the **Menu** pannel under icon.

As you can see in the screenshot, it takes the following values into consideration:

- **Start of duty (LT)** - this is reporting time for duty.
- **No. of planned sectors** - number of sectors planned for one duty.
- **Split Start** - STA of flight preceding split.
- **Split End** - STD of flight following split.

Basic duty is calculated for both Single Crew (if applicable) and Multi Crew. This includes reporting and post-flight duty times.

Latest time on blocks is the latest time allowed for Block On. This is **Basic duty** reduced by the check out time.
