

Passports scans

Passports scans in a section Crew > Endorsements

We have re-arranged adding passports scans to Leon. It will be particularly useful for Leon users who own more than one passport.

Before this change, if you tried to add scans to more than one passport, Leon was showing a pdf scan of the 1st passport only. Now Leon shows scans of all passports in a section **Personal endorsements** properly attached.

You can upload pdf scan in either your profile:

Country	No.	Expires
United Kingdom (GBF) ▼	GB34567834	28-02-2020
(max. 2MB)		
GB passport.pdf		
United States (USA) ▼	US24364242	01-06-2019
(max. 2MB)		
US passport.pdf		

or personal endorsements tab:

Christian Stansfield (STA)						
Basic Information Groups Personal endorsements Ratings User settings Login history						
Endorsement Online Training Practical Training						
Endorsement	Number	Date of issue	Expiry date	Remains	Notes	Scan
Passport alternative	GB34567834 (GBR)	01-02-2015	28-02-2020	2 years 10 months		(max. 4MB) GB passport.pdf
Passport main	US24364242 (USA)	01-04-2013	01-06-2019	2 years 1 month		(max. 4MB) US passport.pdf

Leon allows to upload 1 scan for each passport only. If you have already uploaded scans for your passports, please re-log, go to your profile and re-arrange scans accordingly.

You can also add scans of passports to PAX profile in a section Phonebook - they will get attached accordingly.
