The main change is adding a new tab **Roster** where schedule and crew changes have been moved (cockpit, cabin and other crew).

Flight notifications - the main screen view

We have also re-arranged other 2 tabs:

Trip - number of checkboxes in this tab depends on what items have been marked in Sales checklist (section Settings > Flight editing), i.e.:

- Crew: crew currency
- Flight: catering
- Contract: contract signed, invoices, payments
- Notes: notes

Flight - contains the OPS checklist items marked in section Settings > Flight editing, i.e.:

- Ops: landing permission, overflight permission, ADEP/ADES slots, fuel
- Handling: ADEP/ADES handling agents
- Crew: hotel details
- Cargo: cargo details
- Pax: pax list and catering
- Customs: ADEP/ADES GAR
- Notes: inserted into notes fields of the checklist
